# ACCESS Pediatrics from McGraw-Hill

Bring Experience to Practice

## CURRENT & CURATED

AccessPediatrics is an automatically updated online resource offering instructors, residents, students, and clinicians, an unparalleled suite of texts and tools for reference and research, instruction, and self-assessment.

AccessPediatrics is anchored by *Rudolph's Pediatrics*, which for more than a century has practically defined the discipline. This landmark book, now in its updated 22nd edition, is supported by a dozen titles that span modern pediatric practice. The collection is curated by an expert advisory board, ensuring that users have the latest, most trustworthy information.

## Custom Curriculum TAILORED TO YOUR PROGRAM

More than just a group of digitized books, AccessPediatrics helps users put content in context – from across the collection. With Custom Curriculum, program directors can create a tailored, case-specific reference by assembling exactly the text, procedures, and images their programs need. Instructors can build curriculum-specific topics, using assessment and test elements to track individual resident or student progress.

Residents can study procedures in detail using faculty-selected resources, as well as test themselves and track their performance.

And with Clerkship Corner, clerks get the direction they need to maximize their time as they complete their final years of medical school.

## Trust AccessPediatrics for:

**Focus:** The contents are devoted to the unique characteristics and needs of the pediatric patient, from neonatal care through childhood, youth, and adolescence

**Practical skill-building:** AccessPediatrics places knowledge in clinical context—case studies, periodicity schedules for preventive screening and wellness check-ups, when-to-refer guidelines, and other tools

**Innovation:** Extensive image banks help illustrate procedures, conditions, and neuroimaging in ways that text cannot convey

**Relevant Results:** Powerful semantic tagging and advanced search tools collect results from within AccessPediatrics as well as external sources

**Multimedia tools:** Detailed animations help illustrate pediatric procedures to exam walk-throughs, from descriptions of anatomy to the details of pathophysiology

**Self-Assessment:** Practice exams for residency rotations, pediatric board exams, and pediatric clerkships

## AccessPediatrics includes:

- *Rudolph's Pediatrics, 22e*
- *Neonatology, 6e*
- *Current Diagnosis and Treatment Pediatrics, 20e*
- *Color Atlas of Pediatric Dermatology, 4e*
